

CA CALIBRATION TUBE

The EnPro CA Series Calibration Tube which can be used as a panel mounted reservoir or vapour elimination tube.

The tube can be provided with a graduated scale so that pumping and drain rates can be checked and calibrated.

The borosilicate glass tube is shrouded by protective stainless steel

By having a glass tube, levels can be easily visibly checked and corrected if required.

Tube sizes and lengths are varied depending on the total volume requirement.

Switches can be mounted to give remote level signals.

Features

Design flexibility - End cap materials and volume size can be customised to suit individual Requirements.

Ease of maintenance - 0-rings are the only replaceable maintenance item.

Durable - Quality materials, rugged construction.

Visual Level Indication - Eliminates the guesswork for evidence of the amount of liquids, gasses or vapours that are in the system.

Specifications

Tube: Borosilicate Glass

End Caps, Float and Shield: Stainless steel
Process connections: 1/4"FNPT

Maximum Working Pressure: 500 kPa

Seals: Viton

Size: to 3,000 cc nominal

Travel Indicator: engraved - external

Options: Level switches

CA2000 Tube with Proximity Switch
