

EnPro

LPG Sample Cylinder - LPGSC

The EnPro Liquid Petroleum Gas Sample cylinder has been developed specifically to take samples of LPG from standard LPG vehicle dispensing pumps, at retail bowzers

The Cylinder has a self shut-off valve to limit the size of the sample to 80%.

It can be easily cleaned via valved ports at the top and bottom of the cylinder.

Transportation is safe and easy with valve guards on the top and bottom of the cylinder and for the fill nozzle plus an in-built carry handle.

Standard capacity is 7 litres gross. Other sizes can be accommodated.

Specifications:

Vessel: Stainless Steel
W.P. - 2.55 MPa Design code - AS 2971 Capacity
- 7 litres Shut-off valve
Relief Valve – st. st.
Isolating Valves – stainless steel
