INTRODUCING THE BP-HF251...

The BP-HF251 is a piston-sensed high-flow back pressure regulator for gas or liquid applications. The liquid version includes a Tecasint® seat, whilst the gas version features PEEK™ seating.

With a **balanced main valve** as standard it provides stable control with a high level of accuracy under varying inlet pressures. Plus, its high flow coefficient ensures the BP-HF251 can also cope with higher flow rates.
