

## CA-HP SIGHT GLASS

The EnPro CA-HP Series Sight Glass can be used as a panel mounted reservoir or vapour elimination tube.

The tube can be provided with a graduated scale so that pumping and drain rates can be checked and calibrated.

A mark is provided approximately 35mm from the top of the visible sight glass to indicate the capacity.

The borosilicate glass tube is shrouded by protective stainless steel plate.

By having a glass tube, levels can be easily visibly checked and corrected if required. Excess vapour can be vented.

### FEATURES

#### Design flexibility

End cap materials and volume size can be customised to suit individual requirements.

#### Ease of maintenance

No moving parts or seals, no maintenance required.

#### Durable

Quality materials, rugged construction. Welded construction to minimise leaks.

#### Visual Level Indication

Eliminates the guesswork for evidence of the amount of liquids, gases or vapours that are in the system.

### SPECIFICATIONS

Indicator	Borosilicate Glass
Body, End Caps & Weld Pad	316SS
Process Connections	1/4" FNPT (4 off)
Maximum Working Pressure	10 MPa
Size	To 2,100 cc nominal
Travel Indicator	Visual

### ABOUT US

Since 1990, Haldatec has been providing products and services to the Oil, Gas and related industries in Australia, Pakistan, Singapore, Papua New Guinea, India and New Zealand.

### ENPRO

Our house product label, EnPro, has been developed to complement our core business and has been driven by customer needs. Our comprehensive range includes innovative designs, adaptations and applications introduced to solve problems for our customers.

### STANDARDS

To ensure we provide the best possible support for our customers and suppliers, we have certification to ISO9001:2015.
