

P2BB6M™ BLOCK AND BLEED VALVE

BLOCK AND BLEED VALVES

1/8" Bore Block and Bleed Valve

Block and bleed valves are designed for use with various instrumentation equipment and can be installed to control, isolate, measure, calibrate, equalize, drain or vent the pressure of gases and liquids. These globe pattern valves are of bar stock construction and are available in various materials, sizes, sealing styles, end connections and stem types. The valve features a two-valve block and bleed design with a 1/4" FNPT vent/calibration port. Other features of the block and bleed valve are robust stems, bubble tight seals, and pinned bonnets.

Standard Features

Hydrotested at 150% of rated pressure (shell test). Nitrogen gas tested to 2000 psi.

Complies with ASME B31.1 & B31.3 shell testing procedures as standard. Ensures structural integrity of valve.

Seat tightness (zero leakage) verified to 110% of rated pressure. Nitrogen gas tested to 2000 psi.

Complies with ASME B31.1 & B31.3 seat testing procedures as standard. Ensures zero leakage at seats for proper calibration.

Packing below stem threads

Prevents corrosion of critical stem threads

Metal body-to-bonnet seals are in compression, not tension

Mitigates risk of stress cracking

Stem threads are rolled, not cut

Higher quality stem for longer service life

8 RMS stem finish

Extended packing life

Benefits

V-Style Teflon™ packing

30-40% less operational torque and less frequent packing adjustments than traditional Teflon™ packed valves

Pressure component materials sourced from the US, Canada or Europe

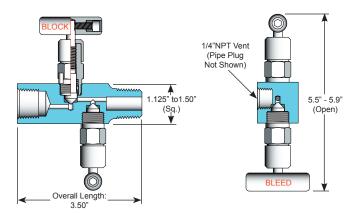

Reliable material traceability. MTR's provided with every order for pressure containing components.

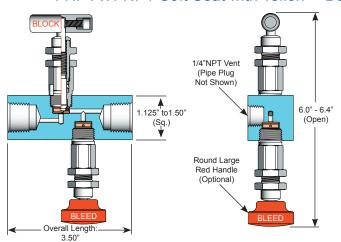

P2BB6M™ Block and Bleed Valve Technical Specifications

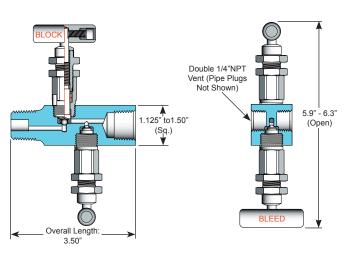

FNPT x MNPT Hard Seat with O-ring Bonnets

FNPT x FNPT Soft Seat with Teflon™ Bonnets

MNPT x FNPT Hard Seat with Grafoil™ Bonnets

Specifications:

Type: P2BB Valve, Globe Pattern Rating: Up to 6000 psi @ 100°F (41370 kPa @ 38°C)

Stem: Needle tip, Ball tip or flat tip (for soft seat) Packing: Viton™ O-ring, Teflon™ or Grafoil™

Seat: Integral, Delrin™ or Peek™

Handle: Removable Bore Size: 1/8"

Inlet Connections: 1/2" NPT to 3/4"NPT, SW or FT

(3/4" for Male NPT, SW Only)

Outlet Connections: Same as inlet

Bleed Port: 1/4" FNPT (includes 1/4" Pipe Plug)

Bonnet Lock: Pin or Plate Body Stock: 1.125" ~ 1.5" sq Weight: 1.7 ~ 1.8 lbs

Special Service: O2 or CL cleaning available*

*Other specifications or services may be available

Use with Confidence, Phoenix Precision Products Meet the Following Specifications:

- ✓ ASME B31.1 Power Piping
- ASME B31.3 Process Piping
- ASME B16.34 Valves Flanged, Thread, and Welding End
- API 598 Valve Inspection and Testing
- MSS SP-25 Standard Marking Systems for Valves, Fittings and Flange Unions
- MSS SP-99 Instrument Valves
- MSS SP-105 Instrument Valves for Code Applications
- NACE MR0175/ISO15156 for all 316SS valves and A105cs body/316SS bonnet (SC-Material Code) when in service with less than 50 PPM of chlorides
