

P2DBB™ DOUBLE BLOCK AND BLEED VALVE

DOUBLE BLOCK AND BLEED VALVES

1/8" Bore Double Block and Bleed Valve

The P2DBB double block and bleed valves are designed for use with various instrumentation equipment and can be installed to control, isolate, measure, calibrate, equalize, drain or vent the pressure of gases and liquids. Phoenix's globe pattern DBB valves are of bar stock construction and are available in various materials, sizes, sealing styles, end connections and stem types. The main features of these DBB valves are dual valve bonnets, robust stems, bubble tight seals, and pinned bonnets. The P2DBB also features primary and secondary valve blocks and a bleed valve designed with a 1/4" FNPT vent/calibration port.

Standard Features

Hydrotested at 150% of rated pressure (shell test). Nitrogen gas tested to 2000 psi.

Seat tightness (zero leakage) verified to 110% of rated pressure. Nitrogen gas tested to 2000 psi.

Packing below stem threads

Metal body-to-bonnet seals are in compression, not tension

Stem threads are rolled, not cut

8 RMS stem finish

V-Style Teflon™ packing

Pressure component materials sourced from the US, Canada or Europe

Benefits

Complies with ASME B31.1 & B31.3 shell testing procedures as standard. Ensures structural integrity of valve.

Complies with ASME B31.1 & B31.3 seat testing procedures as standard. Ensures zero leakage at seats for proper calibration.

Prevents corrosion of critical stem threads

Mitigates risk of stress cracking

Higher quality stem for longer service life

Extended packing life

30-40% less operational torque and less frequent packing adjustments than traditional Teflon™ packed valves

Reliable material traceability. MTR's provided with every order for pressure containing components.

P2DBB™ Double Block and Bleed Valve

Technical Specifications

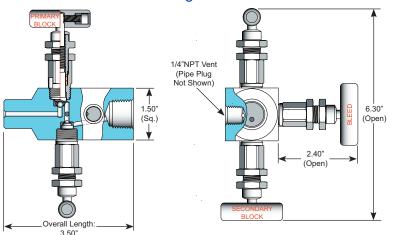

FNPT x FNPT Configuration with O-ring Bonnets

FSW x FNPT Configuration with Teflon™ Bonnets

MSW x FNPT Configuration with Grafoil™ Bonnets

Specifications:

Type: P2DBB Valve, Globe Pattern Rating: Up to 6000 psi @ 100°F (41370 kPa @ 38°C)

Stem: Needle tip or Ball tip
Packing: Viton™ O-ring, Teflon™ or Grafoil™

Seat: Integral Handle: Removable Bore Size: 1/8"

Inlet Connections: 1/2" NPT to 3/4"NPT, SW or FT

(1" for Male NPT, SW Only)

Outlet Connections: Same as inlet

Vent Port: 1/4" FNPT (includes 1/4" Pipe Plug)

Bonnet Lock: Pin or Plate Body Stock: 1.5" sq Weight: 2.5 ~ 2.6 lbs

Special Service: O2 or CL cleaning available*

*Other specifications or services may be available

Use with Confidence, Phoenix Precision Products Meet the Following Specifications:

- ✓ ASME B31.1 Power Piping
- ✓ ASME B31.3 Process Piping
- ASME B16.34 Valves Flanged, Thread, and Welding End
- API 598 Valve Inspection and Testing
- MSS SP-25 Standard Marking Systems for Valves, Fittings and Flange Unions
- MSS SP-99 Instrument Valves
- MSS SP-105 Instrument Valves for Code Applications
- NACE MR0175/ISO15156 for all 316SS valves and A105cs body/316SS bonnet (SC-Material Code) when in service with less than 50 PPM of chlorides
