

P6ST6S™ STABILIZED CONNECTOR WITH INTEGRAL BLOCK VALVE

STABILIZED CONNECTOR

US PATENT NO.: US D615.617 S

3/8" Bore Integral Valve Connector

The ST6S incorporates a stabilized connector with an integral block valve. Redundant soft seats allow the stabilizer to align with a simple half turn, facilitating easy installation. The ST6S incorporates an instrument valve eliminating the potential of pressure shock to the measurement device. Lock pins and a pin insertion tool are provided for easy installation. The ST6S

is designed with two styles of shoes for both round (i.e.: orifice flange unions) and flat (i.e.: senior fittings) surfaces. The slotted bolt holes accommodate 2-1/8" to 2-1/4" bolt spacing. The shoes provide a large footprint which transfers the radial load away from the NPT threads. Dielectric gaskets are available as an option to provide a non-conductive barrier between the instrument and meter run. The ST6S featured wrench flats provide a quick and easy installation.

Standard Features

Hydrotested at 150% of rated pressure (shell test). Nitrogen gas tested to 2000 psi.

Complies with ASME B31.1 & B31.3 shell testing procedures as standard. Ensures structural integrity of

Seat tightness (zero leakage) verified to 110% of rated pressure. Nitrogen gas tested to 2000 psi.

Complies with ASME B31.1 & B31.3 seat testing procedures as standard. Ensures zero leakage at seats for proper calibration.

Packing below stem threads

Prevents corrosion of critical stem threads

Metal body to bonnet seals are in compression, not tension

Mitigates risk of stress cracking

Stem threads are rolled, not cut

Higher quality stem for longer service life

Non-rotating tapered tip stem

Extended soft seat life and a reliable soft seat shut off

8 RMS stem finish

Extended packing life

V-Style Teflon™ packing

30-40% less operational torque and less frequent packing adjustments than traditional Teflon™ packed valves.

Pressure component materials sourced from the US, Canada or Europe

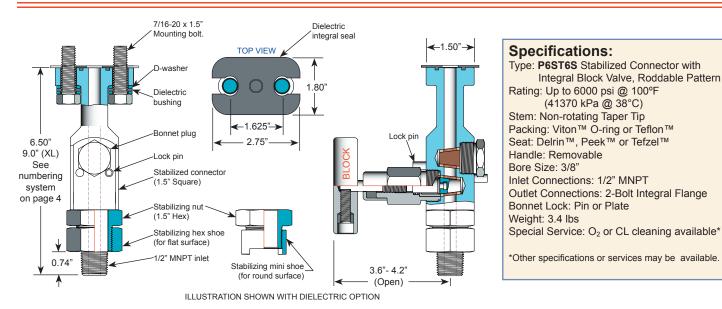

Reliable material traceability. MTR's provided with every order for pressure containing components.

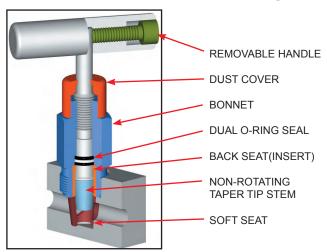

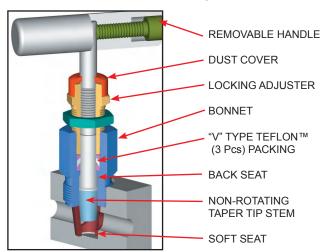

P6ST6S™ Stabilized Valve Connector

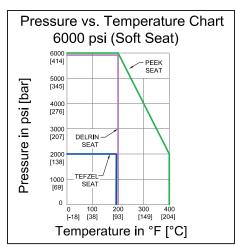

Technical Specifications, Bonnet,Stem and Seat Characteristics

3/8" Bore O-ring and Packed Bonnet Assembly

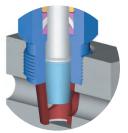

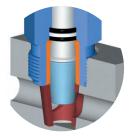

Note: Packing material ratings based on manufacturer's specifications. Approximations only. Phoenix does not represent these values as finite. They are provided only as representative values.

Stem and Seat Configurations

3/8" Bore Non-rotating Packed

3/8" Bore Non-rotating O-ring

P6ST6S™ Stabilized Valve Connector Assembly Procedure and Application

P6ST6S™ APPLICATION

Left: installed with straight manifold

Right: installed with angle manifold

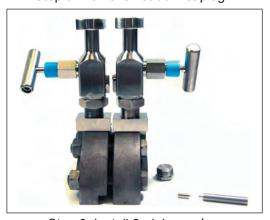

ASSEMBLY PROCEDURE

Assembly of parts

Step 3: Remove 1st bonnet plug

Step 6: Install 2nd bonnet

Step 1: Install 1st tap

Step 4: Install 1st bonnet

Optional: Dielectric kit

Step 2: Install 2nd tap

Step 5: Remove 2nd bonnet plug

Step 7: Install 5-valve manifold

P6ST6S™ Stabilized Valve Connector Model Numbering System

Use with Confidence, Phoenix Precision Products Meet the Following Specifications:

- ASME B31.1 Power Piping
- ✓ ASME B31.3 Process Piping
- ASME B16.34 Valves Flanged, Thread, and Welding End
- API 598 Valve Inspection and Testing
- MSS SP-25 Standard Marking Systems for Valves, Fittings and Flange Unions
- MSS SP-99 Instrument Valves
- MSS SP-105 Instrument Valves for Code Applications
- NACE MR0175/ISO15156 for all 316SS valves and A105CS body/316SS bonnet (SC-Material Code) when in service with less than 50 PPM of chlorides
